SUMMARY

Results-driven C# developer with 4+ years of experience in designing, developing, and maintaining enterprise-level applications. Proficient in C#, ASP.NET, SQL Server, and design best practices, with expertise in APIs, web services, and desktop applications. Beginner-level knowledge of MERN full-stack development, with a growing understanding of MongoDB, Express.js, React, and Node.js. Strong problem-solving, debugging, and database development skills, complemented by effective communication and teamwork abilities.

EXPERIENCE

Mid-Level Software Engineering (Oxpan Microsys)

📅 01/2023 - Present

- create rest API for various applications and middleware's
- Secured connections with Bearer authentication via JWT or API key
- created and updated essential database components including tables, views, and stored procedures
- worked on major projects: coopNxt, mobile banking connector, bancos, Wastage Management.

Junior software developer (Oxpan Microsys)

📅 01/2021 - 12/2022

- Worked desktop applications such as water supply billing management, coopmart store inventory, and transaction management system utilized .NET framework, WPF, and WinForms templates.
- Deep dived into relational database management systems like MSSQL.
- Gathered client specific requirements and provided technical summaries of the resource gathering.

Technical Support (Oxpan Microsys)

📅 06/2017 - 12/2020

- Provide client support for the company's software solutions
- Handle installations and configure databases.
- Perform system updates
- Conduct field visits and offer remote assistance to ensure smooth operations

Education

Bachelor's degree, Computer Software Engineering

ISMT College (FIRST CLASS HONORS) 📅 05/2020 - 04/2023

KEY ACHIEVEMENT

✓ Restful API Development

Develop and maintain RESTful APIs for web app and mobile banking API services.

✓ Desktop application

Work to build desktop application such BANCOS (cooperative banking system), All Mart (Inventory system), WASM (Wastage management system)

✓ Database Design, build and migrate

Design and build various schemas using MSSQL Database management system. Migrate data from various systems into our database.

Projects

CopoNxt:

Designed and developed a RESTful API using ASP.NET Core, implementing JWT-based authentication for secure connections and efficient database management.

MBank connector:

Developed a restful API service that includes various queries and transactional API to connect mobile banking service to our system was secured with API key.

Bancos:

A desktop-based application where my task was to design UI and perform CRUD operation using WPF asp .net framework.

Resume Builder (Personal Project)

It is a MERN project built during study in Broadway MERN course. The key stack used to build this project is JavaScript, typescript, tailwind with shadcn and redux toolkit. Express JS with MongoDB framework was used for backend whereas Vite React was used for frontend.

Skills

C# • ASP.NET Web API • ASP.NET Core • Blazor • HTML

• CSS • JavaScript • React • Express.js • MSSQL

• Dapper • Entity Framework • MongoDB • WPF

• WinForms • GIT • GITHUB • JIRA • xUnit • Swagger

• OpenAPI
